How to configure TCP/IP on Windows-XP

To configure TCP/IP, follow these steps: Click **Start**,

Click Control Panel,

2.) Click Network and Internet Connections, Click Network Connections.

3.) Right-click the network connection that you want to configure, and then click Properties.

4.) On the **General** tab (for a local area connection), or the **Networking** tab (for all other connections), Click **Properties**.

5.) Click **Internet Protocol (TCP/IP)**, and then Click **Properties**.

- 6.) If you want to obtain DNS server addresses from a DHCP server, a. click **Obtain DNS server address automatically**.
